This document defines XMPP protocol compliance levels.

Legal

Copyright

This XMPP Extension Protocol is copyright © 1999 – 2024 by the XMPP Standards Foundation (XSF).

Permissions

Permission is hereby granted, free of charge, to any person obtaining a copy of this specification (the "Specification"), to make use of the Specification without restriction, including without limitation the rights to implement the Specification in a software program, deploy the Specification in a network service, and copy, modify, merge, publish, translate, distribute, sublicense, or sell copies of the Specification, and to permit persons to whom the Specification is furnished to do so, subject to the condition that the foregoing copyright notice and this permission notice shall be included in all copies or substantial portions of the Specification. Unless separate permission is granted, modified works that are redistributed shall not contain misleading information regarding the authors, title, number, or publisher of the Specification, and shall not claim endorsement of the modified works by the authors, any organization or project to which the authors belong, or the XMPP Standards Foundation.

Warranty

NOTE WELL: This Specification is provided on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDI-TIONS OF ANY KIND, express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. **##**

Liability

In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall the XMPP Standards Foundation or any author of this Specification be liable for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising from, out of, or in connection with the Specification or the implementation, deployment, or other use of the Specification (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if the XMPP Standards Foundation or such author has been advised of the possibility of such damages.

Conformance

This XMPP Extension Protocol has been contributed in full conformance with the XSF's Intellectual Property Rights Policy (a copy of which can be found at https://xmpp.org/about/xsf/ipr-policy or obtained by writing to XMPP Standards Foundation, P.O. Box 787, Parker, CO 80134 USA).

1 Introduction

The XMPP Standards Foundation (XSF)¹ defines protocol suites for the purpose of compliance testing and software certification. This document specifies compliance levels for XMPP clients and servers; it is hoped that this document will advance the state of the art, and provide guidance and eventual certification to XMPP client and server authors. Unless explicitly noted, support for the listed specifications is REQUIRED for compliance purposes. A feature is considered supported if all comma separated feature providers listed in the "Providers" column are implemented (unless otherwise noted).

2 Compliance Levels

2.1 Core Compliance Suite

Feature	Core Server	Core Client	Advanced <u>Server</u>	Advanced Client	Providers
Core features					RFC 6120 RFC 6120: Extensible Messag- ing and Presence Protocol (XMPP): Core <http: html="" rfc61<br="" tools.ietf.org="">RFC 7622 RFC 7622: Extensible Messag- ing and Presence Protocol (XMPP): Address Format <http: html="" rfc76<="" td="" tools.ietf.org=""></http:></http:>
					http://tools.ietf.org/html/rfc

¹The XMPP Standards Foundation (XSF) is an independent, non-profit membership organization that develops open extensions to the IETF's Extensible Messaging and Presence Protocol (XMPP). For further information, see https://xmpp.org/about/xmpp-standards-foundation.

Feature	Core Server	Core Client	Advanced Server	Advanced Client	Providers
TLS					RFC 7590 RFC 7590: Use of Transport Layer Security (TLS) in the Extensible Messag- ing and Presence Proto- col (XMPP) <http: html="" rfc75<br="" tools.ietf.org="">SRV records for XMPP over TLS (XEP-0368) XEP- 0368: SRV records for XMPP over TLS <https: extensions="" x<br="" xmpp.org="">0368.html>.Server support means having the ability to accept direct TLS connec- tions.</https:></http:>
Feature discovery					Service Discovery (XEP-0030) XEP-0030: Service Discovery <https: extensions="" x<br="" xmpp.org="">0030.html>.</https:>

Feature	Core Server	Core Client	Advanced Server	Advanced Client	Providers
Feature broadcasts					Entity Ca- pabilities (XEP-0115) XEP-0115: Entity Ca- pabilities <https: extensions="" x<br="" xmpp.org="">0115.html>.</https:>
Server Extensibility		N/A		N/A	Jabber Com- ponent Protocol (XEP-0114) XEP-0114: Jabber Com- ponent Protocol <https: extensions="" x<br="" xmpp.org="">0114.html>.</https:>

Feature	Core Server	Core Client	Advanced Server	Advanced <u>Client</u>	Providers
Event publishing			While 'Personal Eventing Protocol' does not require all the features of 'Publish- Subscribe' to be avail- able on the users' JIDs, and nor does this suite, it is desirable for this to be the case and it is expected that this will a re- quirement of future Com- pliance Suites.		Personal Eventing Protocol (XEP-0163) XEP-0163: Personal Eventing Protocol <https: extensions="" x<br="" xmpp.org="">0163.html>.</https:>

2.2 Web Compliance Suite

To be considered XMPP web compliant, all features from the core compliance suite must be met, as well as all features in this suite.

Feature	Core Server	Core Client	Advanced Server	Advanced Client	Providers
Web Connection Mechanisms	Support can be enabled via an external com- ponent or an internal server module/- plugin. If claiming com- pliance using such an addition, the nec- essary compo- nents/- mod- ules/- plugins MUST be detailed.	☐Only one of the recom- mended providers must be imple- mented for com- pliance.	Support can be enabled via an external com- ponent or an internal server module/- plugin. If claiming com- pliance using such an addition, the nec- essary compo- nents/- mod- ules/- plugins MUST be detailed.	Only one of the recom- mended providers must be imple- mented for com- pliance.	RFC 7395 RFC 7395: An Ex- tensible Messag- ing and Presence Protocol (XMPP) Subpro- tocol for Web- Socket <http: html="" rfd<br="" tools.ietf.org="">XMPP Over BOSH (XEP- 0206) XEP- 0206: XMPP Over BOSH <https: extensions<br="" xmpp.org="">0206.html>. (See also: BOSH <https: extensions<br="" xmpp.org="">0206.html>. 3 Implementation Notes

Some of the protocol specifications referenced herein have their own dependencies; developers need to consult the relevant specifications for further information.

4 Security Considerations

This document introduces no additional security considerations above and beyond those defined in the documents on which it depends.

5 IANA Considerations

This document requires no interaction with the Internet Assigned Numbers Authority (IANA) ².

6 XMPP Registrar Considerations

This document requires no interaction with the XMPP Registrar³.

7 Acknowledgements

The author would like to thank Guus der Kinderen, Dele Olajide, Marc Laporte, Dave Cridland, Daniel Gultsch, Florian Schmaus, Tobias Markmann, and Georg Lukas for their suggestions.

²The Internet Assigned Numbers Authority (IANA) is the central coordinator for the assignment of unique parameter values for Internet protocols, such as port numbers and URI schemes. For further information, see http://www.iana.org/>.

³The XMPP Registrar maintains a list of reserved protocol namespaces as well as registries of parameters used in the context of XMPP extension protocols approved by the XMPP Standards Foundation. For further information, see https://xmpp.org/registrar/.
